

DMLSS

Web-Based Ordering

WHAT IS THE ELECTRONIC CATALOG?

The Medical Electronic Catalog (ECAT) is a web-based ordering system for lab, dental, optical, medical/surgical, and equipment products. Fast delivery, convenient service, and an easy-to-use interface are just a few of the benefits ECAT offers. ECAT also supports special committed volume pricing, enabling individual customers access to tiered pricing and deep unit price discounts based on volume or other considerations such as standardizing on one brand of products.

DELIVERING INNOVATIVE FEATURES

- = Fast delivery ensures products are delivered when needed.
- = Side-by-side product comparison allows the user to contrast product features at a glance.
- = Provides one stop shopping with a variety of vendors.
- = Scheduling recurring orders saves time and overhead.
- = Robust search engine allows the user to find items quickly and easily.

BRINGING CONVENIENCE TO CONTRACTING

- = Choice of payment methods increases payment flexibility.
- = Electronic invoicing = less paperwork.
- = Gatekeeper functionality protects activity's budget from unauthorized use.
- = Destination pricing means no surprises at delivery.
- = Supply and transaction history reports provide business intelligence to the organization.

BENEFITS

- = Eliminate the need to search for products ordered on a recurring basis.
- = Reduce errors through improved product and price comparisons using enhanced catalog search capabilities

FEATURES

- = “One Click” download to DMLSS feature allows an order for the ECAT product to be added to the DMLSS database, enabling automated reorder processes for ECAT products.
- = Gatekeeping and other security features prevent unauthorized access or changes to your lists.
- = “Reorder List in Review” feature automatically indicates when the supplier has made a change to an item on your lists.
